In this case, also, I have every reason to believe, though I will not absolutely affirm it, that no voltaic current was introduced at such moments into the circuit so as to produce the oscillations in question. The experiments made in November, 1800, were conducted under better conditions when the correspondence between Courmayeur and Aosta had been suspended for two months. In these I was assisted by Signor Eccher, adjunct of the chair of physics in this museum, to whose zeal and love for science it is due that even under unfavorable circumstances of weather and place, especially in the winter, all possible precautions were used in order that the experiments...
