The American Mathematical Society, at the request of and in cooperation with the more important educational bodies in America, issued in 1903 their so-called definitions of the contents of the high-school course in mathematics. These definitions have been accepted by the Carnegie Foundation for the Advancement of Teaching, by all the great American universities (including the University of Virginia), and by the educational departments of many of the more progressive States, such as New York. They are here recommended for the State of Virginia and are incorporated into this report. 1. Elementary Algebra. The four fundamental operations for rational algebraic expressions. Factoring, determination of highest common factor and lowest common multiple by factoring. Fractions; including complex fractions, ratio and proportion. Linear equations, both numerical and literal, containing one or more unknown quantities. Problems depending on linear equations. Radicals, including the extraction of the square root of polynomials and of numbers. Exponents, including the fractional and negative. Quadratic equations, both numeral and literal. Simple cases of equations, with one or more unknown quantities, that can be solved by the methods of linear or quadratic equations. Problems depending upon quadratic equations. The binomial theorem for positive integral exponents. The formulas for the  $n$ th term and the sum of the terms of arithmetic and geometric progressions, with applications. It is assumed that pupils will be required throughout the course to solve numerous problems which involve putting questions into equations. Some of these problems should be chosen from...
