Projective Differential Geometry of Curves and Ruled Surfaces

By Ernest Julius Wilczynski

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 edition. Excerpt: .proportional to them. We shall then find an equation of the form $i, (utvk--ukv,) = 0$, also of the w th degree. By the same reasoning as above, we find that the lines of a complex of the n th degree, which are situated in a given plane, envelop a curve of the n th class, the complex curve of the plane considered. The locus of all lines which satisfy two independent equations, homogeneous in the line coordinates, consists of ∞^2 straight lines. It is known as a congruence. Clearly the lines common to two complexes form a congruence. But a congruence need not be the complete intersection of two complexes, just as a space curve need not be the complete intersection of two surfaces. The essential part of our definition of a congruence is that it contains ∞^2 straight lines. The locus of ∞^1 straight...
