Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It's been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

Not illustrated. 1971 Excerpt: . . . proposals or other conceptions of needs or desires of people Can economic factors be used in the decision making process to control location and direction of development of space for Mans needs Since the rise of plant and animal life on this planet, species have developed, flourished and died. Urbanization threatens irreversible changes in flora and fauna or other changes considered detrimental to the quality of the environment. How can undesirable trends be halted or reversed In economic terms, if it is to the benefit of the public that certain biosystems be maintained in present or improved condition without further encroachment or change, what is the publics responsibility for monetary and other losses to the owners of lands and areas involved and how are these costs to be levied One example of the problems that face us in our interactions with the natural environment may be drawn from the wetlands of many of the coastal regions of the Nation. The land-water interrelationship in many locations consist of a marsh-estuary that is considerably unlike either the terrestrial or the ocean environment. These regions are notably rich in nutrient materials for most of the valuable fisheries, shellfish, and organisms within the marine ecosystem. Concurrently, they loom as major potential land development sites for homes, airports, highways, industry and other uses, economically valuable because of their proximity to urban areas and access to the recreation and amenities afforded by their waterfront locations. To be able to put in perspective the consequences of potential land...
