

Proceedings of the London Mathematical Society Volume 24

By London Mathematical Society

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: .the case of a simply-connected area, the nature of the three branch-points, so that the forms of $\frac{1}{2}, \frac{1}{3}, \frac{1}{6}$, will be given by $\frac{1}{i} (0 \pm \frac{1}{2}, (0 \pm \frac{1}{3}, (0 \pm \frac{1}{6})$, where the indices m, n, p are determined by inspection, and where, of the constants $a, 0, y$, two, but not more, may be infinity, in which case the corresponding factors are replaced by unity. Assuming for simplicity that Z does not become infinite at any of the branch-points, it follows that $\text{Tit } 2m, = Sw, = 2-, = N, i i i$ and $S(-$, so that Lastly, since the only irrationality that z contains is the square root of a qnartic function, the expression must have a square factor of degree $N-2$. This is equivalent to $N-l$ equations of condition. Now, since the ratios only of, occur, the functions $/i, /s, /5...$
